**Not all loupes are the same.**

When choosing loupes you want to look stylish but you also need a product that provides long term clinical performance, coupled with the service and support of a company that truly understands your clinical and optical needs.

As evident by our over 10 years experience of supplying loupes to thousands of dentists and our team (which includes opticians) are highly trained to provide informed advice about the award winning Everident™ loupe systems we offer.

These stylish, high quality loupes deliver true comfort and performance as they are designed to minimise weight and save even the highest magnifications.

With a range of stylish and comfortable designs, including metal, plastic and composite finishes, the Everident™ loupe system delivers the performance clinicians need and the features they require.

If you would like to see the difference for yourself please call 020 7515 0333.

A manufacturer’s certificate is available to demonstrate the authenticity of this method which complies with the HTM 01-05.

### Industry News

**Dependable solutions designed for you**

Comfort engineered chairs. Dental systems with an integration Cabriolety that revolutionises comfort.

Discover proven solutions that expand your possibilities whether you want to update your delivery system or look to reimage your entire practice. There’s an A-dec solution designed to meet your current needs, which will also provide the best value at your required investment.

When it comes to optimising operator access and patient comfort, the A-dec 500 dental chair makes no compromises. A slim profile headrest and ultra-thin backrest provide more leg room, so operators can work in a more comfortable position. Meanwhile, the anatomically formed backrest and seat cushion reduces patient pressing by reducing pressure and providing exceptional support. The result is a chair that offers streamlined access for the dental team and, at the same time, comfortable and comfortable seating for patients.

Discover the integrated capabilities and outstanding ergonomics of the A-dec 500 dental chair as it is designed to deliver a higher level of functionality, reliability and customer support than any other dental chair available today.

For more information, please call your authorised dealer or contact us on 020 7515 0333.

Dentomycin® - A Modern Approach to the Control of Gingivitis and Prevention of Periodontitis

The Dentomycin® system successfully manages the effects of gingivitis and assists in the prevention of periodontitis.

Dentomycin® Toothpaste has clinically demonstrated its ability prevent periodontal disease, and has been shown to reduce bacteria by up to 15 per cent. Extensive supporting data comprising 12 major studies in over 1,000 patients confirm that using Dentomycin® Toothpaste and Mouthwash every day is an ideal way of helping to prevent periodontal disease. Dentomycin® Toothpaste is combined with the innovative anti-plaque formula of Dentomycin® guarantors, ensuring excellent control of plaque deposits – No unpleasant taste or aftertaste – No semi-permanent malodour.

Dentomycin® achieves this true triple action against gingivitis:
• Forming an invisible anti-plaque barrier over teeth and gums to reduce the attachment of plaque bacteria
• Interacts with the polysaccharides in the plaque to make it easier to remove
• Keeps the mouth flora in balance to protect from pathogenic invaders

A breakthrough in modern dental technology, Dentomycin® is the helpful solution for both the long and short-term management of gingivitis.

The Carisolv®® Pro® – Simple, Accurate, Cost-effective

With over 30 years of experience in the UK dental market, the Carisolv®® Pro® is well-placed to provide dental care professionals with an uncompromised solution to the treatment of affordable clinical equipment to assist in their everyday practice.

Now, Clark’s is able to offer dental care professionals an innovative means of identifying subgingival plaque and caries at an early stage, thanks to the Carisolv®® Pro®.

By using tooth and offering extremely accurate readings, the Carisolv®® Pro® can detect early carious lesions not readily visible to the naked eye and helps the doctor to develop a treatment plan, helping early intervention and reducing the need for invasive treatments.

Employing Alcian Blue Spectrophotometry (ACIS) to determine the changes in tooth mineral density, the Carisolv®® Pro® is easy to use and allows for frequent monitoring. In addition, the readings are unaffected by stains or tooth discoloration, making even the filthiest of patients perfect candidates for the Carisolv®® Pro® to be applied per-40 to 60 per cent accurate at determining both carious and healthy teeth.

For more information on cutting-edge equipment solutions, please call Clark Dental on: 01384 758 754 or e-mail: sales@blackwellsupplies.co.uk

The affordable implant solution for patients

Cost, aesthetics, comfort and temporary implant therapy for managing moderate to severe chronic periodontitis in one to five or more teeth. Available in easy-to-use 0.5g dispensable applicators.

Dentomycin® is a gel containing the broad spectrum anti- bioptic, minocycline (2 per cent equivalent to 10mg minocycline per applicator). Clinically proven to react with alcohol and has been proven to reduce pocket depths by up to 9mm.

Dentomycin's sticky gel formulation quickly binds to dentine, where it works to treat and inhibit periodontal damage, inflammation, condition the root surface of teeth and inhibit degradation processes, thus promoting healing and enhancing connective tissue attachment.

With Dentomycin® subgingivally, Dentomycin® does not react with alcohol and has been proven to reduce pocket depths by up to 9mm and promotes healing and enhancing connective tissue attachment.

The rules of periodontal care have changed significantly. Today, Dentomycin® is marketed by Blackwell Supplies, along with a handy patient advice leaflet on oral and periodontal health, free to all practices. For more information please call John Joschp on 020 7224 1457, fax 020 7224 1048 or email john.joschp@blackwellsupplies.co.uk

EndoCare Richmond Celebrates Its First Anniversary

One year after EndoCare Richmond first opened its doors to patients, the practice is still going from strength to strength and is now firmly established.

If you are still uncertain about choosing EndoCare Richmond or, in fact, Endodontic treatment in general, here are some reasons to consider EndoCare Richmond, one of which I think we should be proud of is my opinion that I feel happy and confident in my role here.

The modern practice is well-equipped to provide patients with a relaxing experience, both in the chair and out of it. Patients can be a watch a film or listen to music, and enjoy refreshments in the patient recovery room. They then return to the referring practitioner relaxed and ready for further treatment with a fresh aftercare appointment scheduled six months later.

The team of specialists at EndoCare Richmond looks forward to many more years of providing quality dental care and of delivering patients with the positive treatment experience.

For more information about EndoCare Richmond please call 020 7224 5999 or visit www.endocare-richmond.co.uk

LCID celebrates official launch

Dr Kori Ferns celebrated the official launch of the new London Centre for Implant and Aesthetic Dentistry on Wimpole Street this February in the presence of colleagues, friends and family.

Guests were impressed by the practice’s stunning new premises, which include three state-of-the-art surgeries, a sterileroom, a spacious waiting room and immediate plans for a less room on-site laboratory. “The entire practice has been designed to look clean, uncluttered and inviting with a touch of West End elegance,” Dr Ferns said.

Commenting on the ethos of his new venture, Dr Ferns commented “At LCID we are always striving to provide the highest standard of dental therapy today there are a lot of suboptimal results that need to be revised. We want to encourage practitioners not to be afraid of referring their patients. My handpicked associates and the practice manager work closely with the referring dentist and the patient to ensure the best outcomes for the patient’s treatment at the surgery, and will mentor those clinicians who would prefer to undertake treatments themselves.”

For more information on referring to Dr Ferns, call 0207 224 1488 e-mail kori@lcid.co.uk or visit www.lcid.co.uk

Inman Aligner e-courses from Straight Talk

Described as the ‘missing link’ between cosmetic dentistry and orthodontics, the Inman Aligner provides a fast, non-invasive way of treating patients with malocclusion.

Time-pressed clinicians looking for convenient introduction to this revolutionary device should consider Straight Talk Seminars. The 30-minute e-course covers the entire process from start to finish and includes practice video examples.

The re-playable videos meant that I could watch at my own leisure; so I list no time or procedures became more predictable as a result of my step-by-step dissection protocol. Nobel Biocare also provides an extensive range of scanners, CAD/ CAM software for premium aesthetics and dental prosthetics.

Rothelse Biocare – Providing solutions for every patient

In today’s society, patients are becoming increasingly knowledgeable and demanding with regards to the dental treatment that they receive.

When faced with an extraction for example, today’s patient is likely to consider dentures as a viable alternative to restoring their teeth.

As a result, many practices are looking for alternative solutions to improve their patients’ experience; high treatment costs and perceived complexity obscure the way of satisfying the patient’s expectations. As a result, Nobel Biocare, world leader in innovation of the highest standards, have designed a range of outstanding products to provide your patients with the care they deserve.

The Nobel Biocare® Implant system, this no longer has to be a concern. As a result, Nobel Biocare, world leader in innovation of the highest standards, have designed a range of outstanding products to provide your patients with the care they deserve.
