The Dental Directory - for all dental supplies, big and small.

When Albany Dental Care in Edinburgh refurbished their practice, they chose The Dental Directory as their suppliers of choice for large equipment. Today, they still call on the UK's largest independent dental dealer for the rest of their dental supplies.

"We use The Dental Directory for everything right across the board: I estimate that about 90% of our products are sourced through them," co-owner Murray Bremer says.

Murray turns to The Dental Directory for virtually all of their dental needs because of the range of products and services available. The Dental Directory, with their dependable service and low prices, certainly contribute to the smooth running of our practice."

Keeping disinfection wipes fresh and clean at hand

Provide quick access to Virofax Wipes with the Virofax Wipe Wall Mounted Dispenser system — brand new and available from The Dental Directory.

Early mounted using an adhesive pad or wall fitting kit, this dispenser can be locked for security in public areas. When it’s time to refill, the clam-shell design makes doing so easy.

Its sleek, ergonomic shape perfectly complements the modern practice. The unit is also made for durability, with a strong white plastic body and a polished finish.

Every dispenser has a ‘stay fresh’ spring-loaded lip that prevents air from entering the wipe pouch, keeping the wipes inside fresh and moist.

New product releases

Quicklase have released the new 3ke loader laser that is ideal as an introduction laser and priced at only £2,495 inc vat and delivery! The 3ke loader would be used for day to day dentistry for basic procedures such as scaling for accurate impermeable gingival re-contouring for better fitting veneers and crowns, this is in addition to the standard procedures Gingivectomy, Gingioplasty and implant recovery. Also available is a 4w and the model as an air/fuel, which has an 810nm and 980nm wavelength, the K4 K-line lasers are used for teeth whitening and TMJ at a cost effective price. The K4 can also be used for subgingival and subgingival bone loss. Rota-Endo is another great laser providing your local backup and support. This also means that they can offer the Dentalase lasers for root canal retreatment, making laser the preferred mode of delivery. For laser assisted dentistry and in turn making your surgery more profitable.

Quicklase have also released the Mini 810, 8w dual, which has an 810nm and 910nm wavelength. In addition to soft tissue resurfacing, it is also available for 810nm, 980nm and 1,064nm wavelength treatment. Faster healing times for laser, for more information on our endo products. Please visit www.quicklase.com.

Fibik Bulk Fill flowable restorative also offers low shrinkage stress as it can be placed into the prepared cavity and cured in one increment of 4mm.

Contact 3M ESPE today to find out how Fibik Bulk Fill flowable restorative can improve efficiency without compromising on quality at your practice.

3M ESPE 'Most Innovative' Company for ninth year in a row

3M ESPE has been named the ‘Most Innovative’ company in the global dental industry by The Anchem Group, distributor of Dental Fax Weekly, for the ninth consecutive year.

The recognition was received in the 2013 Dental Industry review and was based on new product approvals and international patents – of which 3M ESPE achieved 63 in 2013.

In addition to new product clearances and patents, the review highlighted several products introduced by 3M ESPE in 2013, including: Sol-Lex® Sprint finishing and polishing wheels, Impreg Kry® impression material and a software update for the 3M true definition scanner – a real advantage.

To find out what solutions from the industry recognized most innovative company in dentistry could support your practice, contact 3M ESPE today.

Strength and beauty

When patients need help with bad breath, come to the rescue with a sample CB12 Monodose pack.

With its low concentrations of zinc, sorbate and chlorhexidine, CB12 neutralises the VOCs which can cause bad breath. And because it works evening for up to 12 hours, it can offer sufferers release from the anxieties that may accompany the troublesome condition.

Available in a handy monodose pack that contain one 10ml dose, CB12 tackles the cause of bad breath, rather than just masking it. Easy to use, and with selecting meat-free taste as well as added fluoride, CB12 Monodose provides a simple and effective way for patients to experience the benefit of CB12 and relief from their symptoms.

Large enough for ease of handling, but small enough to be discreet and fit in the pocket, make CB12 Monodose the first line of defence against bad breath.

Come to the rescue now and order your supply of CB12 Monodose samples.

For more information about CB12 Monodose and how it could benefit your patients, please email info@medapharma.co.uk or visit www.c12.co.uk.

GapSeal® - The decisive weapon against periimplantitis

For more information, contact 3M ESPE with a request for a copy of their Endodontic Brochure.

As undiagnosed and untreated periodontal disease is one of the fastest growing areas of hepatitis and companions in dentistry, acting early against gum disease will enable you, as a dental professional, to advise them on how to best protect their gum health. With over 30 years’ gum care expertise, Corsodyl® is recommended for use after orthodontic, surgical and post-treatment planning; and new ultra-low dose modes for orthodontic, surgical and post-treatment planning are just some of the more complex cases where viewing the true measurements and the determination of exact root apex location in pre-operative imaging is critical. The clinician will be able to achieve a flash of the light and eye shield for ease of use and maximum control.

The product has an ergonomic design, a seamless, stainless steel body to make disinfection easy and a two-button operation with one cure mode for all indications. It also features 360° rotation of the light and eye shield for ease of use and maximum control.

Speak to a 3M ESPE customer care representative to find out how your practice will benefit from investing in the Elipar T15 LED curing light, by 3M ESPE's awarded Editor’s Choice and after being reviewed in a 1255 cases, received a 97% clinical success rate by The Dental Advisor. Almost Equally impressive is the fact that 90% of the customers say that they would recommend it to colleagues.

The product is a monomer-free, light-cured hybrid containing 2% ormocer®. It is designed to be used in the primary cavity, with the material being cured in one increment of 4mm and providing nearly twice the strength and beauty when compared to other leading bulk fill flowables.

“100% would recommend the Elipar T150”
