**Every Day Excellence:**

**Dentistry Show 2013**

CeramTec Dental showcased industry leading products and solutions at the Dentistry Show 2013 that enable any practice to deliver a first-class treatment experience. Due to the success of E3i Chair and Planmeca Bensheim at March 20 at the Birmingham NEC, the company has seen an increase in sales in products to accommodate patients quickly and cost-effectively. Delegates who were also to look out for the CS 8100 dental management software, which can be adapted to the needs of the practice. The Skema 6 dental system is the most advanced dental treatment system on the market, including several unique features such as a unique vertical movement and continuous data acquisition for the generation of full colour 3D virtual models of single tooth, quadrants and full arch. With the latest technology and software, it is a step forward in working exclusively in partnership with Siemens, to promote the world's premier brand of high tech dental equipment and support their many loyal customers, when you buy CS/CeramTec Systems you know you’re only getting the best products and services. Contact details for further information can be found below.

**Impressive service and support from Clark Dental**

With over 30 years’ experience in dentistry, the team at Clark Dental offer a complete service design, care and can work with you throughout every stage of your project.

Dr Raluca Mihoc of Poole Dental Practice, Dorset, says: “We decided to work with Clark Dental as they came highly recommended to us, and we knew we would be able to meet any of our needs within our budget. The service was very professional and the process was very smooth. The Clark Dental team installed two surgeries to our exact specifications and were able to accommodate to patients quickly and cost-effectively. The excellence in service and support made it very easy for us to prepare a third surgery for use at a later date. As well as our surgery, Clark Dental also worked on the back end of the practice, including the Schick Digital Imaging System and the Nomad portable x-ray. They have continued to work throughout the business. New launches included the CS 8100 digital panoramic OPG unit, which takes precision images in seconds, and AutoPilot, an advanced soft-wear interface that provides the task process in the straightforward way. The Skema 6 is a next generation digital panoramic system that provides the very highest quality components, ensuring the best possible experience for the patient. Thanks to the most advanced design, the software can be used for all stages of treatment, including the most advanced digital panoramic OPG unit, which takes precision images in seconds, and AutoPilot, an advanced soft-wear interface that provides the task process in the straightforward way. The Skema 6 is also available in Over Patient, Continental Style, or Hanging Tubing instrumentation layouts. With dedicated and extremely knowledgeable sales and technical staff just a phone call away, RPA Dental’s exceptional support team is on hand to advise you on any questions you may have.

**Practice of the Year: The Lisa autoclave from W&H**

**Exciting News, the Lisa autoclave from W&H now comes with an extremely fast effective cycle for the 500 staple sterilisation. W&H now offers the option of rapid sterilisation of unpredictable lengths of instruments, in addition to the proven Class B cycles and the gentle ECO B function, which minimises delays, downtime and heating times. To improve efficiency, the Lisa range has a new, faster cycle, the Lisa ‘Fast 134 Cycle’, which is now available for the class B cycle. The new fast Class B cycle offers the option of an even faster, more economical sterilisation cycle at no extra cost. The Lisa has been designed to be operator-friendly, allowing for easy removal of sterilised unwrapped handpieces as well as solid instruments in just 14 minutes.

In order to better support our customers, W&H Premium Care and Premium Care Systems will offer W&H decontamination products have been developed to enhance your decontamination facility in line with current guidelines, ensuring peace of mind and the confidence that your sterilisation equipment is working at peak performance. W&H 24 hour online support offers information and decontamination data guidelines at www.w&h-support.com.

For further details regarding the full range of W&H products and services, please contact: RHA (UK) Ltd on (0800) 01257 91990.

**Over 80% of dentists see Acid Wear every week**

Many dental professionals are aware of Acid Wear - but new research, conducted by Professor Graham Gardner of Brunel University, demonstrates a light on just how often this condition is seen in practice.

In a survey of 200 dental professionals, completed in January 2013, 83.5% said that they saw Acid Wear among their patients on a weekly or twice-weekly basis, and 86% felt that the condition is on the increase. Patients are also aware of the problem. Nearly 60% of dentists reported that an increasing number of patients were expressing concern to them about Acid Wear.
