Low wear and great aesthetics
Filtek Supreme XTE Universal Restorative is a highly versatile restorative that’s suitable for a range of indications, including direct anterior and posterior restorations. It can be used with confidence thanks to its proven nanotechnology, resulting in wear resistance comparable to zirconia – a fact proven by a five-year clinical study measuring occlusal contact wear.

The strength of complement by like-wise aesthetics, with the product available in a wide range of dentine, body and translucent shades.

Filtek Supreme XTE Universal Restorative is the gold standard of universal composites – call 3M ESPE to find out why.

For more information, call 0845 602 5044 or visit www.3mespe.co.uk

Act early against gum disease
As undiagnosed and untreated periodontal disease is one of the fastest growing areas of litigation and complaints in dentistry, acting early against gum disease has never been so important. The British Dental Defence Union (SDDU) recommends use of the Basic Periodontal Examination (BPE) to help reduce the risk of a claim for failing to diagnose periodontal disease.

First produced by the British Society of Periodontology in 1986, the BPE is a simple screening tool to identify your patient’s periodontal status.

All patients should have the BPE performed and their score recorded, which will enable you, as a dental professional, to advise them on how to best manage their disease.

The purchase of a dental unit can be a significant investment for any practice.

According to UK Ortho, a leading UK orthodontic and dental products supplier, there’s never been a better time to invest in orthodontic equipment. The company has introduced a range of new orthodontic products, for both general dentists and orthodontists. The Dental Directory now has a wide range of quality equipment in stock.

Dental Directory is delighted to offer UnoDent Sterile Dental Injection Needles in two brand new sizes.

The Dental Directory is delighted to offer UnoDent Sterile Dental Injection Needles in two brand new sizes.

The short and extra short needles are a great addition to the already popular range and are available offering excellent ergonomic handling and maximum comfort for the patient. These newly sized needles will ensure you continue to deliver the best possible care, every time.

Available in boxes of 100, the range now includes 27G Short 25mm; 27G Long 32mm; 30G Extra Short 15mm and 30G Short 21mm.

To find out more about our extensive product range, contact one of our friendly representatives today.

Excavating caries: check-ups are good, SRIOncept is better

In May Serena, technology leader in the dental industry, is bringing a digital system onto the market that enables dentists to identify reliably, quickly and simply where carious tissue does or does not exist. SRIOncept is based on Fluorescence-Aided Caries Excavation technology, known as FACE®, which exploits the fluorescence characteristics of teeth. If teeth are illuminated with violet light in the spectrum of around 405 nm, it doesn’t only stimulate degradative products of caries bacteria but also healthy dentine to fluorescence. Healthy dental tissue lights up green whereas carious areas are vividly red. The attending dentist can therefore see at first glance – and very clearly – which areas are carious and which ones are not.

The Dentistry Show 2015 to host The Dental Awards

The Dentistry Show is delighted to announce that the prestigious Dental Awards 2015 will be held as part of next year’s event. Recognising and celebrating the achievements of individuals and groups throughout the UK, the coveted Awards will offer yet another highlight to what has become known as the dental show of the year. The Awards will provide an alluring new opportunity for delegates at the Show to get involved with the profession, while celebrating their many triumphs in the last year. Once again ensuring The Dentistry Show is at the forefront of the modern industry, The Dental Awards 2015 will offer an even more varied and exciting social and networking programme.

“We are thrilled to be supporting the dental profession in this way, and we look forward to hosting such a distinguished and respected event.”

For information on entering the 2015 Dental Awards please contact: annie@查漏plumbing.com.

Finding your way around a GDS contract

The team at Goodman Grant Solicitors have 75 years’ experience in dealing with the regulatory bodies that govern the dental industry. As such they are perfectly situated to provide advice and guidance in all areas of dental contracts. GDS contracts run to several hundred clauses over approximately 150 pages and have provision for any number of contracts, many of which may or may not be applicable in individual circumstances.

Specifically designed to accommodate dental partnerships, they cover the many scenarios that can result from buying and selling partnerships, the purchase and sale of the whole practice, and can be tailored to suit the preferences and the image of the practice you and can be tailored to suit the preferences and the image of the practice you.
