TANDEX

Recommend Tandex to your patients to maintain the health of their teeth and gums. All dentists agree that good dental hygiene starts in the home, but with an estimated 80 per cent of the British population showing signs of gingival inflammation, the importance of home care is of paramount importance. It is significant that only 35 per cent of patients currently use mouthwash, which has shown that only a minimal percentage of people in the UK use dental floss.

Tandex supply a range of interdental brushes, such as the Flexi brush. These soft bristles do not harm the delicate gingival tissue, yet provide excellent access to plaque and plaque debris.

Tandex gel makes these interdental brushes all the more efficient, as it reduces gingival fluid flow as well as the bacteria count in plaque and saliva. In addition, its alcohol-free formula helps to protect tooth enamel.

For more information on Tandex's range of products, visit www.tandex.dk

For more information please call Nuview on 01453 872 266 or email info@nuview-ld.com www.nuview-ld.com

Smile-On – the solution for maintaining dental aesthetics

The Ultra Safety Plus range includes 27g short, 27g long, 30g short and 30g long handpieces to the bone as well as a transparent barrel to allow a clear view of aspiration. Indicated for the routine administration of local anaesthetics, the sterile, single use handpiece and any external irrigation tube for a period of two seconds. This effectively removes any residues and any remaining physiological fluids such as saline. Suitable for use with either hard or soft tissue.

Saline is often used as an irrigant and unless your handpiece has been designed to work with saline, it could potentially damage your handpiece. Smile-On’s range of equipment has been designed to work with saline and is easy to use. An attachment for irrigation is available to ensure correct irrigation. The Aquacare spray nozzle and spray through the handpiece and any external irrigation tube for a period of two seconds. This effectively removes any residues and any remaining physiological fluids such as saline. Suitable for use with either hard or soft tissue.

For further information on special offers or to place orders call Jackie or Garber or to book a place please call 01344 752560 NOW, email: info@bichorrone.com or visit our website at www.bichorrone.com

25 years providing medical optics

DF Medical Systems is in its 25th year of supplying market leading Optical systems to the medical profession. The company’s mission statement is “to make our customers feel at ease by means of vision, safety and efficiency, to be able to see more clearly, safely and to significantly increase their productivity.”

Communication and Consent: Ophthalmic theatre. Correct posture and visual acuity are of paramount importance in all surgical procedures and can be enhanced by leading dental schools and teaching institutions which have incorporated the Global Dental Microscopes into their theatres. Global Surgical is now internationally the system of choice by leading dental professionals. Many thousands of UK dentists have benefitted by choosing Surgitel Binocular Loupes and Lights in their everyday practice, testimony of its support and application for all forms of dental practice and internationally recognised for this.

Technical theatre environments are considered essential by the company to provide the complete package.

Contact DF Medical Systems Ltd for a no obligation discussion with one of our regional product specialists to see how you can enhance your efficiency and work. DF Medical Systems Ltd. 020 301 4851 sales@dfmedicalsys.com
