**UCL Eastman Dental Institute CPD course in Sports Dentistry**

Practitioners with an interest in the dental needs of sporty people and athletes may now take this specialist course in sports dentistry, consisting of 12 study days over ten months, with talks from senior lecturers and clinicians from the Eastman faculty and the London Sports Institute.

The dental aspects covered by the course include the prognosis and treatment of dental and mandible facial trauma, and progression of neurological injury. The course also covers tissue healing, stress and TMD dysfunction and tooth surface loss in relation to sport activity.

Other topics include the effects of sports injury, diet and nutrition, medico-legal aspects of dental injuries and much more, making the course of particular interest to those involved directly with sports injuries and equipment. Not only could you find a bargain, but you can also do your bit by recycling your old equipment and redundant materials.

By using the Stock X-Change, the dental profession benefits, with repeat injuries solved with excess items but have no idea how to dispose of them without leaving them to the mercy of the landfill, visit the Dental Stock X-Change to buy and sell dental products and equipment. Not only could you find a bargain, but you can also do your bit by recycling your old equipment and redundant materials.

**EndoCare, EndoCare, EndoCare**

**A quality referral service at EndoCare, EndoCare, EndoCare**

Nobel Biocare’s pioneering research and development have enabled clinicians to tackle complex rehabilitations of the edentulous maxilla and the mandible with ease, thanks to the U-4 on-4 system.

Compatible with NobelGuide®**, the U-4 on-4 system reduces the amount of the time the patient has to spend in the chair and reduces the time of the implant procedure. The system involves NobelReplace® implants and two angled posterior implants to hold a full arch restoration, both of which are in harmony with the patient’s features and the arch form. The all-on-4 implant system also has a highly aesthetic and culminating effect of all the previously mentioned aspects.

For more information about EndoCare please call 020 7224 9999 or visit www.endocare.co.uk

The OPTRI Pico Microscope from Nuvex

The OPTRI Pico Microscope, designed by Carl Zeiss and created especially for the dental profession, represents a leap forward in dental magnification and illumination. Already established in specialist arenas like endodontics, the Zeiss dental microscope is only the latest of a long line to change the general dental practice landscape, but is also offering itself as an invaluable tool for everyday dental treatment.

The OPTRI Pico is available in two or three head configurations, allowing it to be optimised to fit your clinic’s needs. Whether you are looking for a simple yet effective dental microscope with built-in camera, or a state-of-the-art all-seeing setup, Nuvex offers a solution for you and your patients.

The OPTRI Pico’s on-board camera ensures that high-quality images can be shared with colleagues or printed for the patient. The camera also enables you to capture moments during the treatment, which can subsequently be used for training purposes or marketing.

In addition, the OPTRI Pico’s ergonomic design makes it a pleasure to use, even for extended periods. It is also easy to clean and maintain, requiring minimal effort to keep it in top condition.

Dr David Garber, an American Prosthodontist, will be coming to the UK this year to give a lecture on the cutting-edge techniques he uses in his practice. Dr Garber is considered one of the USA’s top ten most innovative companies by The Dental Advisor Magazine and is recognized as one of the USA’s top Ten most innovative companies by United Dental World.

An evening with Dr David Garber

Highly acclaimed American Prosthodontist, Dr David Garber will be hosting a one-off evening at the Royal College of Physicians on May 25th, 2011, entitled, "Transforming Implant Aesthetics: Options, Alternatives and New Directions".

This program takes an alternate perspective and demonstrates how "esthetic-driven" implant dentistry has evolved, and why it is not just about 'newer and whiter’ materials to achieve that. The program will discuss all other aspects of implant dentistry, particularly beyond aesthetics over the long-term, the adjacent implant dilemma and submucosal root augmentation. Lecturing on multi-disciplinary approaches to optimizing aesthetics, Dr Garber’s program integrates restorative dentistry and periodontal implants.

The cutting edge of implant prosthodontics and an integral part of "Team Dentistry", with the support of Bionaire Goldenstein, Dr Garber will be talking on evolving implant aesthetics and the role of BioHorizons implants in this area. Starting with registration from 6.30 – 7.00pm when refreshments will be served, the lecture will run from 7pm until 9pm in the Sunstein Theatre of the Royal College of Physicians, with 2 hours of CPD for all delegates.

For more information on this special evening with Dr Garber or to book a place please call 0344 7529502 or email info@biobionaire.com or visit our website at www.biobionaire.com

Groin infections with ChairSafe XL Wipes

ChairSafe XL wipes are available in four convenient packs. One third of dentists feel that their professional environment is not up to the standard they believe it should be. For this reason, ChairSafe has developed the ChairSafe XL Wipes.

ChairSafe XL wipes are available in four concentrations, for the most confident practice.

New dental practice owners will inevitably have a lot of paperwork and legal administration to contend with in the first weeks and months of their new venture. Nowadays, of course, they also have another dimension to consider: their new employees. The PDA has added these three topics to its series:
