We have multi-skilled healthcare professionals in this country who provide dental health care to the population. Dedicated, committed and highly skilled dental teams are focused on offering high quality care for patients within and without the NHS. However, sometimes things can go a little awry and their professional integrity is called into question.

If this happens the overriding concern is always for patient safety but professionals also need support and sensitively to ensure they are treated fairly by the organisation employing them. After all, for the majority, an episode of sub-standard performance will not spell the end of a career.

With the right support and management of the situation most professionals will continue with their work and the treatment of patients. Quick and effective intervention regarding performance concerns should result in the desired outcomes – which must always include support for the practitioner. Importantly, all concerns must be treated in a fair and consistent manner.

Consider these questions:

- What constitutes a performance concern?
- Who could/should raise concerns?
- Do those who could or should raise concerns know how to do so?
- Who should manage a performance concern once it has been raised?
- Do you know the answers to these questions?

A ‘poor performance’ reporting system should be simple enough to follow so that everyone knows who to speak to and what will be done, whichever the concern involves. Sometimes it is difficult to voice concerns especially if it relates to your boss, however, it is important to remember your reasons for raising a concern at this point. Your in-house process and procedure will have identified individuals who will be able to help at this point.

Performance concerns may relate to:

- Standard of work – for example frequent mistakes
- An inability to handle a reasonable volume of work to a

**The World’s First Online MSc in Restorative & Aesthetic Dentistry**

Two of the UK’s most respected education and academic organisations have joined forces to provide an innovative, technology driven MSc in Restorative and Aesthetic Dentistry. Smile-on, the UK’s pre-eminent healthcare education provider and the University of Manchester, one of the top twenty-five universities in the world, have had the prescience to collaborate in providing students with the best of everything – lecturers, online technology, live sessions and support.

- **Convenience**
  The majority of the learning resources on this programme will be online. The masters will combine interactive distance learning, webinars, live learning and print.

- **Ownership**
  The programme is designed to encourage the student to take responsibility for his/her own learning. The emphasis is on a self-directed learning approach.

- **Community**
  Students will be able to communicate with a diverse multi-ethnic global community of peers, with who they will also share residential get-togethers in fantastic settings around the world.

- **Opportunity**
  This innovative programme establishes the academic and clinical parameters and standards for restorative and aesthetic dentistry. Students will leave with a world recognised MSc.

Champions® Implant System
(R)Evolution in Implantology and Prosthodontics: MIMI® Method (Minimally Invasive Method of Implantation)

Dr. Armin Niederk suggested.

"I have developed the Champions® implant system, a reliable and innovative implant system that can be readily used in the day-to-day work of dental offices. In more than 200 dental offices already use Champions® implants, and they performed more than 50 000 implantations last year. Can you want to be a new Champions® user?"

**Advantages**
- Success rate: 98% – Win 80% of patients and doctors
- Safe and secure
- Pre-drilled holes in abutments, which can be used for many indications
- High-quality at affordable prices
- Excellent primary stability
- Optical immediate loading
- Excellent postoperative instructions
- Immediate function and successful treatment
- Micro-surgery with good prognosis and the highest quality materials
- Free titanium bonding
- Free loan of the surgical kit
- Exclusive – not sold or available in the market

**His trading with others when this is a required standard**

- Professional performance
- Professional behaviour or professional performance which applies to your health, safety or may affect your professional performance
- Professional performance which are affected by a condition or illness
- Professional performance which are affected by a condition or illness

**If you have one of the above concerns, what comes next?** Below are some important thoughts you may have and actions you may take:

- Consider the risk to patient safety
- Consider what your options are
- Ensure you are fully aware of the process you need to follow
- Ensure you know how to form the individual
- Ensure you know that the systems are in place to support the individual
- Know if this concern needs to be dealt with formally or informally
- Decide what to do

What the GDC says you should do regarding performance concerns is contained in its code of behaviour Standards for dental professionals. Its guidance can be summarised as follows:

- The duty to put patients’ interests first and act to protect them must override personal and professional loyalties
- You have a duty to work within your knowledge, professional competence and physical abilities

This responsibility includes making sure that you:

- Get and follow medical advice if you know that you have a serious condition which you could pass on to patients, or that your judgement or performance could be seriously affected by a condition or illness
- Get help if you have any other problems which are affecting or may affect your professional performance
- Only carry out a task or type of treatment if you are sure that you have been trained and are competent to do it
- Do not put anyone off raising a concern about your health, behaviour or professional performance
- Co-operate fully with any procedure for investigating concerns which applies to your work

In my next article, I’ll discuss turning around poor performance.
