Take control with the Optima MI2 INT from Bien-Air

Bien-Air has developed probably the most efficient dental micromotor on the market with the Optima MI2 INT. Thanks to Smart Logic technology, the Optima MI2 INT control unit offers ultimate regulation of the power required, thereby and without vibration ensuring you are in perfect control of the speed, torque and reversal at all times. With this kind of regulation, the Optima MI2 INT is incredibly intuitive and adopts to most dental needs. Being particularly versatile the control unit offers 10 pre-programmed functions: ultrasonic work and time sequences for your endodontic work, all at the quick press of a button. This Swiss made control unit has been developed with your endodontic work in mind. You can perform your endodontic treatments with complete confidence and, as the Optima MI2 INT has been designed to reduce the risk of nitric acid burn to an absolute minimum. A true all-in-one system the Optima MI2 INT makes your life easier! In most cases 2 contra-angle handpieces are sufficient to carry out the vast majority of dentistry. go on to take control with the Optima MI2 INT from Bien-Air as the MI2 INT drives the new LED MI2 VX MicroMotor. MI2 VX is shorter than the predecessor and with its shorter micro motor the MI2 INT is perfect to carry out the smallest of procedures quickly and efficiently.

Contoured Disinfection: Alkazyme® continuously disinfects the contaminated ‘wash water’ in the ultrasonic basin.

Alkazyme® is an enzymatic cleaning and disinfecting agent for the thorough cleaning and disinfection of all reusable, immobile dental instruments prior to sterilisation.

Rapid cleaning action: When used in conjunction with a standard ultrasonic cleaner, Alkazyme® in a 5 minute immersion time is all that is required to render soiled instruments thoroughly clean & shining bright.

Economical: Just five grams of Alkazyme® with ordinary tap water makes one litre of enzyme cleaning/disinfecting solution.

Choice of user format: Available from all dental sundry suppliers in both 750gm loose powder tub and tubs of 100 easy-dose water soluble sachets.

Practice Plan makes a further climb in the Sunday Times Top 100 Best Companies For an eighth year running, the team at Practice Plan were all keen to find out where they would be positioned in the Sunday Times Best Companies for 2012 and for the second year running, another fifth in the ranking was achieved!

The company attained 38th place in the top 200 best companies to work for! This ranking is based on votes cast by people working at the company. The Sunday Times Best Companies survey is an authoritative ranking of the best employers in the UK. The survey is based on over 300 questions covering all aspects of life at work and rewards companies for their dedication to ensuring all employees are valued.

And, as a further cause for celebration, Practice Plan was one of only 113 organisations out of 1082 entrants to successfully achieve Three Star Status in the Best Companies accreditation.

New software update supports the hands-free operation of the SIRIUS endodontic treatment system

As soon as the file reaches the apex of the root canal the dentist can instantly discontinue the use of the foot-switch.

Version 2.5 of Sinora Dental Systems SIRIUS endodontic treatment system has been designed to save time and provide the most effective and convenient root canal treatment. As soon as the dentist reaches the apex the file can be removed from the root canal and the treatment is complete. This innovative feature allows the file to be removed from the root canal without the use of the foot-switch.

For further information please contact: Sinora Dental Systems 0845 071 5040 info@sinoradental.co.uk
or contact your local QED Salesperson.

RECIPROC® is made from M-wire™ NiTi which is stronger and more flexible than the ferritic stainless steels traditionally associated with several problems, including the discolouration of the teeth and tongue, as well as interference with taste perception. However, the unique patented Anti-Discolouration System (ADS) developed by Curaprox, and used in every Curasept ADS product, helps to keep these side-effects to a minimum without in any way hindering the efficacy of the active ingredients – a fact that has been independently verified by three clinical studies. In addition, Curaprox ADS mouthwash is alcohol-free, thus reducing the incidence of burning and sensitivity experienced by some patients, resulting in higher levels of compliance. Curaprox ADS mouthwash comes in two strengths: 0.2 per cent or 0.5 per cent, making it suitable for both daily use and post-operative use. Also available in the range is Curaprox SSL- free toothpaste (0.5 per cent), and periodontal gel (0.5 per cent), providing the full spectrum of protection against oral pathogens.

For free samples or for more information please call 01480 802004, email info@curaprox.co.uk or visit www.curaprox.co.uk.

Save time and money with dbg

Since its earliest days when dbg was known as the Dental Buying Group, dbg has worked hard to expand from its original core to encompass a broad range of fields in order to provide its members with the very best in value and support.

dbg services now include service, management and compliance programmes to help members stay up-to-date with the latest updates in CDQ™ and DH legislation. It’s arranging equipment maintenance, or organising training to meet the latest regulations, dbg is a solution to your practice’s needs. But while it may have expanded its fields of expertise, dbg can still offer its members substantial savings on the products and services that the business was founded upon.

With over 7,000 members already, dbg strives to be practice managers’ first port of call for all new practices, making it the perfect platform for those just starting out in your chosen field. And with a range of solutions, dbg is ready to support you at whatever stage in your career.

For more information on the benefits of dbg membership, or to join, call 0800 006 6112 or visit www.thedbg.co.uk.

CCD England only, dbg’s management programmes are available to all Dental Practices throughout the UK.

The LIT appliance training course

The LIT appliance was born out of the understanding that many patients become acutely conscious that their appearance could be visibly improved if their front teeth were straight. Provided that the other teeth were sound it seemed illogical to undertake any restorative treatment A sponsorship of £35 will go towards one day’s travel and accommodation for all forms of dental implant treatment, including the innovative All-on-4™ technique.

KENT IMPLANT STUDIO – working together for positive outcomes

Kent Implant Studio is now taking referrals for all forms of dental implant treatment, including the innovative All-on-4™ technique.

Kent Implant Studio prides itself on working in partnership with referring dentists to provide implant rehabilitation ranging from single tooth replacements to full arch support. Dr Tim Quin, for example, uses a fixed implant supported denture and full arch with augmentation reconstruction. Depending on what works best for you the team will be happy to either place and restore implants, or place and expose, returning the patient to their home practice for the final restoration.

In addition, thanks to the long standing partnership with implant manufacturer Nobel Biocare, Kent Implant Studio is able to transfer direct cost savings directly to patients.

With affordable, quality implants the Kent Implant Studio offers outstanding treatment for all patients. Refer your patients to the Kent Implant Studio today for quality restorative and aesthetic treatment options at a price that suits every budget.

For more information, or to obtain a referral pack, call 01622 071 305 or visit www.kentimplantstudio.co.uk

Beautify your patients’ smiles with the Inman Aligner

Straight Talk Seminars are the official trainers for the Inman Aligner – an innovative appliance that straightens anterior teeth quickly and gently. Offering both online and hands-on courses in the UK, USA, Europe, the Middle East and Australia, practitioners and patients worldwide are benefiting from this specialist training.

Jessica Harvey is the current Miss North Carolina in the USA, and commercial treatment co-ordinator for Straight Talk Seminars. In January, Jessica’s dentist Dr Ross Nash attended a Straight Talk Seminar course in Orlando, run by UK-based experts Dr Tif Qureshi and Dr James Russell, who also helped form the treatment plan to ensure the best results.

“The Inman Aligner was a huge part of my smile make-over,” says Jessica. “The appliance was able to do in three months what would have taken traditional braces at least a year or more.

“I am a very busy woman and the need for speed was really important. The Inman Aligner was patient friendly and I was very happy to recommend it to anyone who is considering beautifying their smile – I have never felt better or more confident about my smile than I did now.”

For more information on Straight Talk Seminars visit www.straight-talk.co.uk or phone 0344 366 5477.

CARESTREAM DENTAL

Superior digital imaging exclusively from Carestream Dental

Using digital x-ray technology, Carestream Dental offers unparalleled image quality and the highest image resolution in the industry (true resolution superior to 20 Ip/mm) whilst the sensor is extremely robust and waterproof, thanks to its protective silicone layer. State-of-the-art WiFi technology allows the user the freedom to operate anywhere, with the option to share the images at any point in the treatment. With data uploaded within seconds, the practitioner gets the data they need almost instantaneously, saving treatment time.

Freedom of movement is also translated into image portability, with direct transfer of data to iPod devices without the need for a computer and the ability to review and edit images whenever and wherever the practitioner wants.

For superior technological solutions, Carestream Dental provides. For more information contact Carestream Dental on 0880 169 9692 or visit www.carestreamdental.co.uk.
