Take control with the Optima MI2 INT from Bien-Air
Bien-Air has developed probably the most efficient dental micromotor on the market with the Optima MI2 INT. Thanks to Smart Logic technology, the Optima MI2 INT control unit offers ultimate regulation of the power required, thereby and without vibration ensuring you are in perfect control of the speed, torque and reversal at all times. With the Optima MI2 INT you are completely intuitive and adopts to most dental hands. Being particularly versatile the control unit offers 15 pre-programmed working sequences, a work time display and sequences for your endodontic work, all at the quick press of a button. This Swiss made control unit has been developed with your endodontic work in mind. You can perform your endodontic treatments comfortably with simple memory, and the Optima MI2 INT has been designed to reduce the risk of NI9: Negative torque breakthrough to an absolute minimum. A true all-in-one system the Optima MI2 INT makes your life easier! In most cases 2 contra-angle handpieces are sufficient to carry out the vast majority of dentistry, so get as close to control with the Optima MI2 INT from Bien-Air as the MI2 INT drives the new LED MI2 Microtor M2 is longer than the predecessor and as an additional feature, with the Optima MI2 INT, you can also use the new MI2 LED Microtor M3. NIH 2.0 and NIH 3.0 are directly suitable for the M2 and M3 handpieces and also suitable for the handpieces of the Optima MI2 INT.

The route to successful endodontics
NI9: understood that successful endodontic treatment requires precision and attention to detail. NI9: Range of endodontic handpieces, microtoros, ultrasonic scalers and apex locator provide clinicians with a superior level of technology, leading to more predictable treatment outcomes. NI9: ENDO-MATE® D1 endodontic microtoro is specifically designed for use with files. Files are from all major suppliers. This ultra-lightweight, lightweight endodontic micromotor delivers comfortable and painless procedures and minimal memory. It is able to store up to six speed and torque settings. NI9: ENDO-MATE TC2 handpiece has a large LED display, is lightweight and extremely ergonomic. This simple, single-key operation makes it easy to use even during the most delicate endodontic procedures. The NI9: VARIO TC2 (ultra-lightweight TC2 scale) provides a patient’s friendly and efficient way to match the needs of endodontists by choosing the speed (crank) and a choice of 10 preset optimised speeds, there is always one to meet your needs. Each VARIO TC2 file is supplied, as standard, with a ten LED handpiece, 3 tips, 3 tip sleeves and an autoclavable container. Those looking for a more compact and would benefit from either the VARIO TC2 or the VARIO TC2, which is specifically designed as a portable control unit for easy installation into any dental unit. In addition, the VARIO TC2 is available in both a unit, where all its functions can be controlled via the NI9: VARIO TC2 handpiece. The VARIO TC2 handpiece is light, weightless and can be used in any handpiece of your choice, providing superior feel. The system is controlled via the NI9: VARIO TC2 control products. It is available in a one litre concentrate that weighs only 40 ml of Instrumentsafe makes a one litre, four per cent solution. 17 red dots recognising ‘high design quality’ have been awarded to products such as Sonicare DiamondClean, Philips Sonicare, Magik FX and Aquafresh. “The process provides an additional way to ensure the highest design quality for the Philips range of products”, said Dr. Jan van der Velden, Senior Product Manager in the Instruments Division of Sirona Dental Systems. A new software update supports the hand-piece free operation of the SIRONEndo endodontic treatment systems, with the file reaches the apex of the root canal the dentist can intervene in the direction of rotation via the foot switch.

Version 2.0 of Sirona Dental Systems’ SIRONEndo module on the passport to more effective and convenient root canal treatment. As soon as the dentist reaches the apex he can reverse the rotation of the file tips. All Sirona files are available in a one litre concentrate that weighs only 40 ml of Instrumentsafe makes a one litre, four per cent solution. 17 red dots recognising ‘high design quality’ have been awarded to products such as Sonicare DiamondClean, Philips Sonicare, Magik FX and Aquafresh. “The process provides an additional way to ensure the highest design quality for the Philips range of products”, said Dr. Jan van der Velden, Senior Product Manager in the Instruments Division of Sirona Dental Systems. refer patients through the EndoCare website if they should so wish. After impressions really matter, and patient care. The EndoCare team today for further information please call EndoCare on 020 7724 0990 or visit www.endocare.co.uk

Exceptional endodontic treatments from EndoCare today for superior Endodontic treatments and exceptional patient care. The EndoCare endo team firmly believe that first impressions really matter, and that this is why every referral EndoCare treat with care. EndoCare refer patients through the EndoCare website if they should so wish. After the initial referral comes treatment, which is a long and complex procedure, the patient will receive an excellent level of care in state of the art facilities, from specialist clinicians who are passionate about the job they do. Throughout this entire process of care, the treatment the referring practice is constantly kept up to date with details of the procedure and any associated treatment plans. Thanks to exceptional treatment, with an emphasis firmly on patient care, patients are returned to their referring dental care team and calm that the treatment they received was to the highest standard possible.

To find out more about how EndoCare referrals can benefit your practice, contact the EndoCare team today. For further information please call EndoCare on 020 7724 0990 or visit www.endocare.co.uk

RPA Dental – we heart dentists

In the competitive world of dentistry, some companies stand out more than just price alone.

At RPA Dental we understand that perceptions are often looking for a little bit more from their equipment provider – something extra that makes them stand out from the crowd. That’s why we launched iheartdentalists – a campaign that was designed to prove that there is a campaign designed to show our clients just how much we care.

As a UK-based dedicated family business, we pride ourselves on knowing each one of clients personally, knowing exactly what each individual patient needs and where they have it; knowing nurses on first name terms, and knowing exactly who works where and when within the facility. It’s this level of care and customer support that we feel makes us stand out and stand head and shoulders above other equipment providers as we really do heart dentists, and we think you’ll love us too.

To discuss your requirements or to arrange a consultation, give us a call on 0800 933 975, or visit our website equipment, www.rpadental.com

Superior digital imaging exclusively from Carestream Dental

Superior digital imaging exclusively from Carestream Dental is a cornerstone of one of the most talked about technological advancements from Carestream Dental.

Renowned for providing the dental profession with the highest standards of care, Carestream Dental has set out to provide digital imaging solutions, the Kodak 9000® represents a breakthrough in utilising wireless technology.

With affordable, quality implants the Kent Implant Studio offers outstanding results. In addition, thanks to its long-standing partnership with implant manufacturer Nobel Biocare, Kent Implant Studio prides itself on working with implant manufacturers and laboratories who have given me lots of positive feedback. The course has also helped me to get more work now, which I’m working much more closely with the laboratory who has given me lots of positive feedback.

We decided to do the course because I lacked the confidence to take on more complex cases and I wanted a clear understanding of how to establish anterior aesthetics,” says Dr Turo.

"I really enjoyed the course. I now have the confidence and knowledge to go further with more complex cases. I had missed the opportunity to attend the course at one point in the future, and I am sure that will help me to make it a smooth transition. This already increased my current confidence and increased my income, something that is particularly important in these more restrictive times. I’m finding work, I’m making much more closely now with the laboratory who have given me lots of positive feedback. The course has also given me the skills to reduce the number of slower cases and increase my income. A small discreet appliance, no extractions and some interdental stripping was done to establish anterior aesthetics, “ says Dr Turo.

 Berkshire based Straight Talk Seminars are the official trainers for the Inman Aligner - an innovative appliance, straightens anterior teeth quickly and gently. Offering both online and hands-on courses in the UK, USA, Europe, the Middle East and Australia, practitioners and patient alike are benefiting from this unique appliance. Jessica Harvey is the current Miss North Carolina in the USA, and commenced treatment with the Inman in January. Jessica’s dentist Dr Ross Nashed attended a Straight Talk Seminar course in Oranienburg, in the US, by UK-based experts Dr Turo and Dr Chaudhry, who also helped form the treatment plan to ensure the best results.

"The Inman Aligner was a huge part of my smile make-over”, says Jessica. "The appliance was able to do in three months what would have taken traditional braces at least a year or more.

What an amazing experience it has been to work with the transformation happened so quickly and it was a pleasure for me as the dentist to do this for anyone who is considering beautifying their smile – I have never felt better or more confident about my own smile”, she says. For more information on Straight Talk Seminars visit www.straight-talks.com or phone 0345 366 5477

Beauty your patients’ smiles with the Inman Aligner
