A simple rotary system for optimal endodontic treatment
Dental Syl's CMA System was designed to simplify endodontic treatments by minimizing the number of instruments necessary and providing one uncomplicated sequence for both treatment and obturation.

CMA stands for Connaul, Medial and Apical and provide a simple sequence with only four core instruments in the range. Conional C-flare out the coronal portion of the canal, Medial M to enlarge the middle part of the canal and Apical F to a sharpen the apical portion of the canal. CMA provides safe, secure and reliable rotary instruments with several unique design features like an automatic file disengagement system to access to root and hillock shape to aid removal of debris from the canal. CMA instrument also have a cross-section with two cutting angles for excellent cutting efficiency and feature a non-cutting tip to ensure the instruments the trajectory of the root canal.

CMA files are available in lengths in 21mm, 25mm or 29mm and in 8 pack of six instruments.

To download the full CMA product brochure and visit a demonstration video please visit www.cobang.com and select the CMA link under the “Products” tab. Contact Dental Sky on 0800 294 4703.
