The American Academy of Implant Prosthodontics (AAIP) joined with its affiliates, Atlantic Dental Implant Seminars (ADIS) and the Linkow Implant Institute, to present a five-day comprehensive implant training course in Ocho Rios, Jamaica, in early July.

The course included lectures, hands-on participation, surgical and prosthetic demonstrations, diagnosis and treatment planning of implant cases, the construction of surgical templates, diagnostic wax-ups, the insertion of two to six implants by each participant and sinus lifts under supervision of the course faculty.

The nine participating dentists inserted 56 implants, performed three sinus lifts and restored seven implants placed in a previous course. Patients were provided by the Ministry of Health and the University of Technology, School of Dental Sciences, of Jamaica. Course participants were from Arizona, Illinois, New Jersey, New York, Jamaica and St. Kitts.

Upon completion of the one-week comprehensive implant-training program, participating clinicians are able to accomplish the following tasks: identify cases suitable for dental implants; diagnose and treatment plan for preservation and restoration of edentulous and partially edentulous arches; demonstrate competency in the placement of single-tooth implants, soft-tissue management and bone augmentation; obtain an ideal implant occlusion; work as part of an implant team with other professionals; and incorporate implant treatment into private practice with quality results, cost effectiveness and profitability.

A dental degree was required for all participants. The course was tax deductible and 35 hours of dental continuing education credits were awarded upon course completion. Patient treatment was provided in a Jamaican dental school with personalized training in small-group settings. The course is a cooperative effort of the Jamaican Ministry of Health, the University of Technology, School of Dental Sciences, Jamaica, and the American Academy of Implant Prosthodontics.

Dr. Mike Shulman is course coordinator, Dr. Leonard I. Linkow is course director and Dr. Sheldon Winkler is course advisor. Course faculty, in addition to Shulman, Linkow and Winkler, include Drs. Robert Braun, Ira L. Eisenstein, E. Richard Hughes, Charles S. Mandell, Harold F. Morris, Peter A. Neff, Robert Russo and Robert E. Weiner. Shulman and Winkler taught the July seminar.

Implants and components for AAIP/ADIS implant seminars were provided by HIOSSEN Dental Implants. Dental laboratory support was provided by DCA Laboratory, Citrus Heights, Calif., Dani Dental Studio, Tempe, Ariz., and Dutton Dental Concepts, Bolivar, Ohio.
