Stay on top of new techniques, products with implants

Thanks to continuous advancing technology, the field of implant dentistry is always growing, changing and evolving. Clinicians need to be vigilant in their efforts to keep up with the new techniques, new products and new technology that could affect how they plan implant treatment.

That’s just one reason the publication you are holding right now is so valuable.

As always, in this issue of implants, we’ve assembled a collection of articles from a variety of respected names and companies in dentistry. These expert clinicians are sharing their first-hand knowledge and expertise with you. In this issue, you can read about small-diameter implants, and you can also learn about immediate implant placement and provisionalization. We also have news on implant events and technology.

But that’s not all.

Every issue of implants magazine also contains a C.E. component. By reading the articles (beginning on Page 6) on “Long-term clinical success in the management of compromised intertooth spaces utilizing small-diameter implants,” by Dr. Paul Petrungaro, and “Immediate implantation and provisionalization: Single-tooth restoration in the esthetic zone,” by Dr. Susan McMahon and Karrah Petruska, and then taking short online quizzes on the articles at www.DTStudyClub.com, you will gain one ADA CERP-certified C.E. credit.

Keep in mind that because implants is a quarterly magazine, you can actually receive four C.E. credits per year out of your already busy life without any lost revenue and time away from your practice. To learn more about how you can take advantage of this C.E. opportunity, visit www.DTStudyClub.com.

Finally, if you are interested in becoming a published author, we are always looking for experienced clinicians to write C.E. articles and offer their expertise to our readers. Contact Managing Editor Sierra Rendon at s.rendon@dental-tribune.com for more information on submitting an article.

I hope you enjoy this issue of implants and that it enhances your daily life in the dental office.

Sincerely,

Torsten Oemus
