PIPS Laser Endo harnesses the power of the Lightwalker

Dual wavelength, all-tissue Er:YAG & Nd:YAG laser cleanses canals
ENDODONTIC SOLUTIONS

Better Solutions, Better Outcomes!

Chlor-XTRA™ Multiple patents pending
6% sodium hypochlorite solution enhanced with surface modifiers
Compare to Ultradent® ChlorCid™

EDTA 17% Solution
Lower pH for optimal smear layer removal
Compare to Ultradent® EDTA™

CHX-Plus™ Multiple patents pending
Final irrigation step for long lasting cleansing
Compare to Ultradent® Consepsis™

Mix & Match Buy 3 Get 1 FREE

NEW patent pending SmearOFF
ONE PRODUCT, MULTIPLE BENEFITS.
Removes smear layer and kills bacteria
Compare to Sybron Endo SmearClear™
- Superior chelation and enhanced cleansing
- Optimal smear layer removal
- Kills 99.99% E. faecalis bacteria

Offer code: ROOTS-413
Good through June 15, 2013

Wykle Research has announced the release of two new Calasept Endo products, which it distributes for Nordiska Dental of Sweden, the manufacturer of Calasept and Calasept Plus.

Calasept Irrigation needles are high-quality, double-side-vented, luer-lock irrigation needles that optimize the cleansing of canals, creating a “swirl effect.” The needles are available in 27 g or 31 g, in packs of 40 needles. Features include the following:

- Bendability
- Luer-lock hub
- Sterile and disposable
- Designed for ease in cleaning roots
- High-quality stainless steel

Calasept Irrigation Syringes are 3 ml luer-lock, single-use syringes. They are color coded to eliminate risk when using multiple irrigation liquids. They are available in packs of 20 syringes, 10 white and 10 green. Features include the following:

- High-quality, three-part syringe
- Color coded
- Luer lock

These new products complement Wykle’s popular Calasept line, which includes Calasept and Calasept Plus calcium hydroxide paste for temporary filling of root canals, sold in packages of four syringes with 20 needles. Calasept EDTA is 17 percent EDTA solution. Calasept CHX is 2 percent chlorhexidine solution for irrigation. Both solutions are packaged with a luer adaptor for easy filling of syringes.

Wykle Research distributes Calasept Endo products by Nordiska Dental, a Swedish manufacturer of Dental supplies. Wykle Research and Nordiska Dental will continue to provide new endo products.

For more information, contact Wykle Research at (800) 859-6641 or visit the company online at www.wykleresearch.com.
BUC® Ultrasonics

Use for Access Refinement, Retreatment, and Restorative procedures. There’s a BUC tip ready to accomplish a multitude of endodontic treatment challenges.

Plasma light source from Seiler

Latest advance is designed to offer clearer, crisper images

Have you seen the light? Seiler’s new Plasma light source, that is!

It’s even brighter than 180 W Xenon and three times as bright as an LED, with over 100,000 LUX and it has a bulb life of more than 10,000 hours.

See clearer, crisper images through the use of live video and/or a digital camera.

The Plasma can be retrofitted to an existing scope or equipped on any new operating microscope.

Seiler continues to stay at the forefront of fine optics and stands behind its products with a lifetime warranty on the optics and mechanics.

To experience the Seiler advantage, call (800) 489-2282 to schedule a free demonstration, or visit www.seilermicro.com for more information._
